Introduction

»DIE kleine BERLIN-STATISTIK 2011« (statistics for the City of Berlin, 2011, key facts and figures) offers information on the development of the German capital based on the most important statistical results.

This document is divided into chapters on different topics. Chapters 1 – 27 present figures on the city's demographic, economical, social, cultural and political structures. As far as possible, developments have been highlighted by comparing with the figures for the years 2002, 2006 and 2010. The document also contains information on the city's boroughs (Chapter 28), data on Berlin's development since 1871 (Chapter 29) and accumulated figures for the region of Berlin/Brandenburg (Chapter 30).

On December, 31, 2010 the surface of Berlin covered 892 km². Of it were allotted 626,8 km² to the settlement and traffic surfaces. The proportion of the settlement and traffic surfaces was 70,3 percent.

Berlin had at the end of 2010 3,460,725 inhabitants. In relation to the conditions of the yearly beginning that was 18,050 persons more. With it since the year 2005 the registered increase in the population continued to continue. At the end of 2010 457,806 foreigners living in Berlin.

At the end of 2010, there were 1.9 million dwellings in Berlin, 4,243 more than at the end of 2009. Most of these new dwellings were built in Pankow (1,446) and Friedrichshain-Kreuzberg (695).

With approximately 20.8 million overnight spent in accommodation establishments in Berlin as well as 9.1 million guests were once again surpassing the figures of the previous year and thereby breaking

the record for the eight time in a row. The accommodating establishments announced 9.5 percent more arrivals of guest and 10.2 percent more overnight accommodation than in the year 2009.

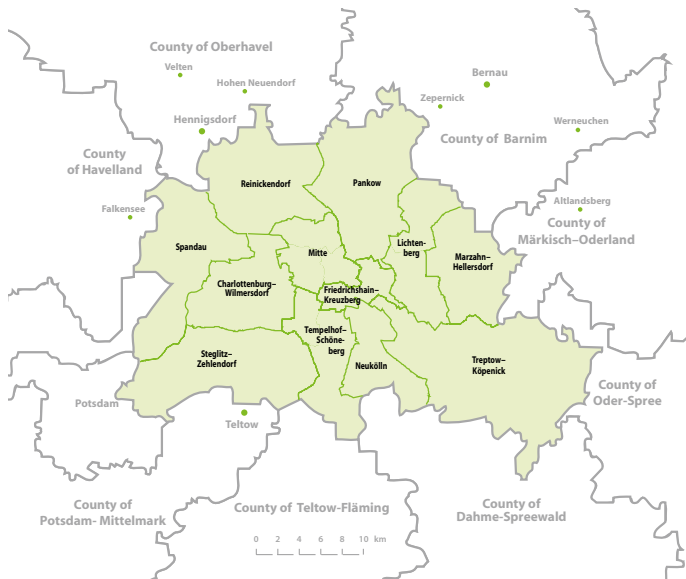

The national economic development in Berlin fell in 2010 from positive. In Berlin increased price-adjusted gross domestic product by 2.2 percent. The medium-term analysis of price-adjusted economic development shows that Berlin since 1991, steadily, if slightly upward developed, but only in 2009 had a setback.

In the year 2011 there were two large elections in Berlin. Besides the choice of the Berlin Chamber of Deputies (Berliner Abgeordnetenhaus) also found the elections to the Borough council Assemblies (Bezirksverordnetenversammlungen). The SPD with 28.3 percent of the second votes is the strongest party in Berlin, followed by the CDU with 23.3 percent and the party Grüne with 17.6 percent.

»DIE kleine BERLIN-STATISTIK 2011« gives an initial overview of the data provided by official statistics. A similar brochure has been published for the federal state of Brandenburg (»DIE kleine BRANDENBURG-STATISTIK 2011«). Those interested can also find a similarly structured selection of figures and data for the Federal Republic of Germany as well as benchmark figures for the German federal states in the »Pocketbook: Germany«, published by the Federal Statistical Office and under www.statistikportal.de.

02.1 Population

Data on the total population as well as the demographic and regional distribution of the population are provided by censuses which are carried out at intervals of several years. Their findings serve as the basis for updating the official total population figure which is shown here (as of 31 December).

03 Livelihood

Information on the economic and social situation of the population is provided by the microcensus. This involves an official, annually performed household survey which covers one percent of all households. These households are selected by means of a random mathematical procedure. Interviewers provide information about the survey which is performed on location.

	Unit	2002	2006	2010

3 Since 2009 only parental benefit

04 Households and Families

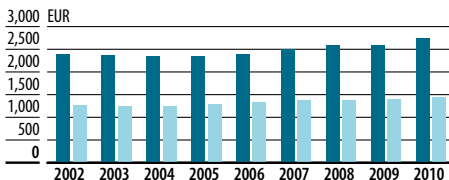

Every community of persons living together and forming an economical unit as well as persons who live alone and, nevertheless, manage for themselves are counted as a household (private household).

A household may include relatives and persons who do not belong to the family as such (e.g. partners in life). Married couples with children as well as single parents and unmarried couples with their unmarried children living in the same household are counted as families.

	Unit	2002	2006	2010
Private households by size of household				
Private households	1000	1,858.7	1,933.4	1,988.5

14 National Accounts

National accounts (VGR) are a statistical system for presenting a comprehensive, overall view of the economic activities of all business entities in

Berlin. They are based on the European System of national accounts (ESA 1995) and the Classification of Industries (WZ 2003). At the centre of

national accounts is the origin of the gross domestic product (GDP) as a measure of performance in Berlin.

Gross domestic product price-adjusted % change on previous year

16.1 Employment and Compensation of Employees

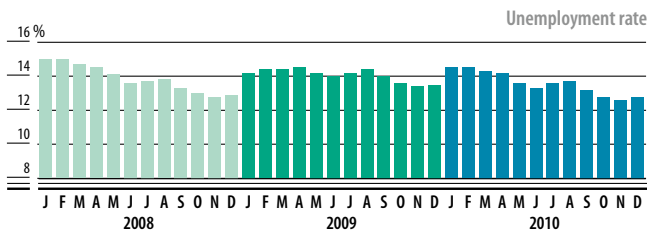

The number of employed persons along with their wages and salaries are determined within the scope of national account based on the Klassifikation der Wirtschaftszweige WZ 2003 (Classification of Industries). The figures on the number of employed persons correspond to the workplace concept; that is, all employed persons who have their job in Berlin are taken into consideration. In the result for income creation the figure for employee earnings reflects all of the cash and non-cash benefits accrued to employees working in Berlin from work or other employment relationships.

20 Foreign Trade

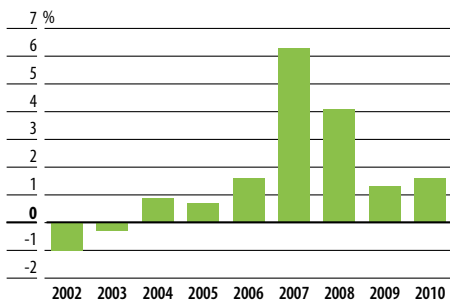

The foreign trade statistics provide figures with regard to the movement of goods across the frontiers (export and import) between Berlin and foreign countries. The basis for the results is provided by the customs documents of importers and exporters in the trading industry with countries outside of the European Union (extra trade) as well as the statistical registrations of acquisitions and deliveries within the community within the meaning of the Value-Added Tax Law (intra trade).

The construction price indices show the quarterly development of the prices realised by Berlin building companies for certain types of construction work and certain types of structures as well as for various types of maintenance work on buildings, independently of the site of performance. The selected construction work and building types are also included in a uniform federal weighting scheme of specified shares (weights) when it come to calculating the price index. The base year for the building cost indices at present is 2005.

Change on previous year

23.1 Earnings

The surveys on earnings, from which the average values were taken, are carried out in the form of sampling. As of 2007, this includes full-time employees (both men and women) working in industry and services as well as those who are part-time employed and persons in marginal employment. In accordance with the classification of economic activities (Klassifikation der Wirtschaftszweige – WZ 2008); results of the previous years are converted.

Berlin	60.2	28.3	23.3	17.6	11.7	1.8	8.9

The parties received parliamentary seats in accordance with their share of the valid second votes. A party which won more direct parliamentary seats than it was entitled to in accordance

with its share of the second votes in the entire polling area was authorised to retain such seats won in addition to the number gained through proportional representation. The other parties

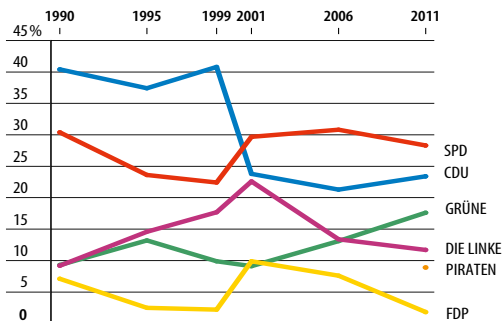

received as many compensatory seats as were required for allocation of the parliamentary seats in accordance with the proportion of the second votes.

27.5 Elections

On 7 June 2009 the citizens of Berlin were able to directly participate in an election for the European Parliament (Europäisches Parlament) for the fourth time. In the case of the European elections which took place prior to German Reunification in 1979, 1984 and

1989 the Berlin representatives in the European Parliament were determined by the House of Representatives (Abgeordnetenhaus von Berlin) in accordance with the size of the respective parliamentary groups represented there.
